

Endur i9

Strong plastic pallet for big bags and heavy loads up to 1500 kg in the high rack

Made of impact-resistant PP – no metal reinforcements – this pallet is ideal for semi-hygienic applications and for high-rotation usage such as open or closed pools. The pallet is made using gas-assist technology, meaning that internal gas channels are used to make the pallet extra strong. This benefit is especially useful when the pallet is used in racks. The best solution for heavy loads and big-bags.

Anti-slip options

- Strips topside deck
- Safety rim (-mm) fixed as
- Grommets topside deck (max. 12 pieces)
